Long Ranger 4 Professional Wireless PA System

The Long Ranger 4 wireless PA system is a high output sound system for outdoor public address applications.

This high quality portable PA system is ideal for just about any situation where clarity and flexibility is required on location. Common applications include outdoor auctions and the instruction of large groups of people where clarity is required. (search and rescue situations).

The built-in wireless microphone, convenient second wireless microphone channel, rechargeable power supply and the high audio output set this system apart from any other portable PA system available. The Long Ranger 4 includes a professional quality VHF wireless microphone system with up to 750 feet of operating range due. A highly sensitive receiver and full power transmitters provide extended range and solid reliability.

- High audio output covers large outdoor areas with clear voice recognition.
- Built-in VHF wireless microphone allows complete freedom of movement.
- Optional dual-channel wireless capability.
- Operates on rechargeable battery pack or external 12 Volt DC power.
- Fast Charge circuitry for 3-hour recharge time and/or AC powering.
- Powers built-in and/or external speakers.
- Sold as a complete system including transmitter, microphone and charger.
- Designed and made in the USA.
