

4x4 & 4x5.65 Filter Inventory Clearance Sale

Reduced pricing on all in stock Formatt 4x4 & 4x5.65 Glass Filters (no further discounts). All filters include a padded filter pouch.

The Formatt glass filter is a precision manufactured composite of the highest quality optical glass with a specially formulated optical polycarbonate. The glass (Schott-Desag B270) is of World Class optical quality with an exceptionally low Abbe number. Surface finish is critical to ensure a consistent image. Each imperfection can result in a dispersion of the colour components of white light. The use of B270 coupled with the Formatt standard of surface finish reduces this to the physically obtainable minimum.
